

Couples Finance App

Feature Reference — Para sa Mag-asawa at Bagong Kasal

Ang app na ito ay dinisenyo para sa mga mag-asawa at bagong kasal na gusto nilang pamahalaan ang kanilang pera nang magkasama — may shared wallet para sa joint expenses, at personal pocket para sa bawat isa. Narito ang buong 20 features na inirerekomenda, kasama ang detailed na paliwanag kung paano gumagana ang bawat isa, key sub-features, at implementation notes para sa developers.

MUST HAVE	Core foundation ng app	NICE TO HAVE	Adds real value	STANDOUT	Differentiator feature
-----------	------------------------	--------------	-----------------	----------	------------------------

CORE — SHARED FINANCE

W

Shared Wallet / Joint Budget

MUST HAVE

lisa lang ang 'family pot' — lahat ng gastos, lahat ng income, visible ng dalawa sa real-time.

PAANO GUMAGANA

- May isang 'household' entity na nag-oown ng shared wallet. Ang dalawang partner ay naka-link dito bilang members.
- Lahat ng transactions sa shared wallet ay visible ng dalawa — real-time sync via Firebase RTDB o Supabase Realtime.
- Ang bawat transaction ay may 'created_by' field para malaman kung sino ang nag-gastos.

KEY SUB-FEATURES

- Monthly budget cap per category (groceries, utilities, dining, etc.)
- Running total ng gastos vs. remaining budget — visible sa home dashboard
- Contribution tracker: sino naglagay ng pera at magkano (salary, transfer, freelance)
- Budget reset every 1st ng buwan — o custom cycle ng mag-asawa

IMPLEMENTATION NOTES

- wallets table: id, household_id, owner_user_id (NULL = shared), type, monthly_limit
- transactions table: id, wallet_id, created_by_user_id, amount, category, date
- I-push ang notification sa partner kapag may bagong transaction sa shared wallet

R

Bill Splitting & Expense Split

MUST HAVE

Sino mag-babayad ng anu — 50/50, o custom percentage per category o per transaction.

PAANO GUMAGANA

- Sa bawat transaction, pwedeng i-define ang split type: equal (50/50), custom percentage, o one pays all.
- Ang system ay nag-track ng running balance — sino ang may utang sa kanino sa loob ng buwan.
- May 'settle up' feature para i-clear ang balances — direct bank transfer o GCash.

KEY SUB-FEATURES

- Default split rules per category — halimbawa, groceries = 60/40, Netflix = 50/50
- One-time override per transaction para sa special cases
- Monthly settlement summary: 'You owe Juan ₱1,240 this month'
- Split history at proof ng payment para walang away

IMPLEMENTATION NOTES

- transaction_splits table: transaction_id, user_id, amount_owed, is_settled
- Compute running balance as SUM of unsettled splits per user pair
- Push notification kapag may bagong split na assigned sa'yo

T

Shared Savings Goals

MUST HAVE

Bakasyon, bagong bahay, down payment — visual progress bar na nakikita at niko-contribute ng dalawa.

PAANO GUMAGANA

- Ang mag-asawa ay pwedeng mag-create ng goals (e.g. 'Japan Trip — ₱80,000 by June').
- Bawat goal ay may target amount, target date, at current saved amount.
- Pwedeng mag-contribute ang dalawa — manual deposit o auto-deduct from shared wallet monthly.

KEY SUB-FEATURES

- Visual progress bar na may percentage at days remaining
- Projected completion date based sa current saving rate
- Goal milestones with celebrations (50% reached, etc.)
- Multiple goals na may priority ranking — alin ang uunahin
- Goal contributions history: sino naglagay ng pera at kailan

IMPLEMENTATION NOTES

- savings_goals table: id, household_id, name, target_amount, current_amount, target_date
- goal_contributions table: goal_id, user_id, amount, contributed_at
- Auto-calculate: $\text{monthly contribution needed} = (\text{target} - \text{current}) / \text{months_left}$

U

Personal 'Allowance' Pocket

MUST HAVE

May sariling budget ang bawat isa — no judgment zone. Private spending na hindi kailangang i-explain.

PAANO GUMAGANA

- Bukod sa shared wallet, ang bawat partner ay may sariling personal pocket.
- Ang transactions sa personal pocket ay HINDI visible ng partner by default — privacy by design.
- Ang allowance amount ay naka-agree ng dalawa at nire-reset monthly.

KEY SUB-FEATURES

- Monthly personal allowance na nare-receive from shared wallet automatically
- Personal spending tracking — visible lang sa sarili
- Optional: pwedeng i-share ang personal spending summary (total lang, hindi breakdown)
- Rollover option: mag-carry over ba ang unused allowance sa susunod na buwan?

IMPLEMENTATION NOTES

- wallets table: owner_user_id = logged-in user's ID (not null = personal)
- RLS (Row Level Security) sa Supabase: personal transactions visible to owner only
- Monthly auto-transfer: cron job na mag-aalis ng allowance amount from shared at ilalagay sa personal

MONEY AWARENESS & TRACKING

C

Combined Income Tracker

MUST HAVE

Lahat ng suweldo, freelance, at side income ng dalawa — consolidated view para malaman ang total household income.

PAANO GUMAGANA

- Bawat partner ay nag-log ng kanilang income sources — regular salary, freelance, allowance, business.
- Ang system ay nagco-combine ng lahat para makita ang total household income per month.
- May income trend chart: papalaki ba o bumababa ang combined income over time?

KEY SUB-FEATURES

- Multiple income sources per person (salary, side hustle, investments, etc.)
- Recurring income setup — isang beses lang i-set, auto-log every month
- Income vs. expenses ratio dashboard — savings rate calculation
- Year-over-year income comparison

IMPLEMENTATION NOTES

- income_entries table: id, user_id, household_id, source_name, amount, type (recurring/one-time), date
- Monthly income = SUM of all income entries for the month across both users
- Savings rate = $(\text{Total Income} - \text{Total Expenses}) / \text{Total Income} \times 100$

S

Category Spending Breakdown

MUST HAVE

Food, utilities, entertainment, health — per person at combined. Alam mo agad kung saan napupunta ang pera.

PAANO GUMAGANA

- Bawat transaction ay may category tag — awtomatiko o manual na pina-assign.
- May monthly donut chart o bar chart na nagpapakita ng spending per category.
- Pwedeng i-toggle ang view: 'Combined household' o 'Per person' breakdown.

KEY SUB-FEATURES

- Default categories: Food & Dining, Transport, Utilities, Health, Entertainment, Shopping, Education
- Custom categories na pwedeng i-add ng mag-asawa
- Budget limit per category na may color-coded alert (green/yellow/red)
- Top spending category highlight bawat buwan
- Month-over-month comparison per category

IMPLEMENTATION NOTES

- categories table: id, household_id, name, color, monthly_budget, icon
- transactions.category_id = FK to categories
- Aggregate query: GROUP BY category_id, EXTRACT(MONTH FROM date) for trend data
- Alert trigger: kapag na-reach ang 80% at 100% ng category budget

N

Net Worth Tracker

NICE TO HAVE

Assets minus debts — buwanang snapshot para makita kung papalago ang kayamanan ng pamilya.

PAANO GUMAGANA

- I-input ang lahat ng assets (savings, investments, properties) at liabilities (loans, credit card, mortgage).
- Net Worth = Total Assets - Total Liabilities. Ina-update monthly.
- May historical chart na nagpapakita ng net worth trend over time.

KEY SUB-FEATURES

- Asset categories: Cash & Savings, Investments, Real Estate, Vehicles, Other
- Liability categories: Personal Loan, Car Loan, Mortgage, Credit Card, Others
- Monthly snapshot — kahit hindi updated, may record ng bawat buwan
- Net worth milestone celebrations (first ■100K, ■500K, ■1M, etc.)

IMPLEMENTATION NOTES

- net_worth_snapshots table: id, household_id, total_assets, total_liabilities, captured_at
- assets at liabilities table na may type, name, current_value, household_id
- Monthly cron job para mag-auto-snapshot ng net worth

Utang, credit card, mortgage — alin ang uunahin? Snowball (smallest first) vs Avalanche (highest interest) method.

PAANO GUMAGANA

- I-list ang lahat ng utang ng mag-asawa — may balance, interest rate, at minimum payment.
- Pumili ng payoff strategy: Snowball (maliit muna) o Avalanche (pinaka-mataas na interest muna).
- Ang app ay nagko-compute ng projected payoff date at total interest na mababayaran.

KEY SUB-FEATURES

- Debt list: name, current balance, interest rate (%), minimum monthly payment, due date
- Payoff strategy comparison: Snowball vs Avalanche — alin ang mas mabilis, alin ang mas matipid
- Extra payment simulator — kung magdagdag ng ₱1,000/month, ilang buwan mauna ang payoff?
- Debt-free date projection with countdown
- Celebration milestone kapag na-pay off ang isang utang

IMPLEMENTATION NOTES

- debts table: id, household_id, name, original_balance, current_balance, interest_rate, min_payment
- Snowball sort: ORDER BY current_balance ASC
- Avalanche sort: ORDER BY interest_rate DESC
- Amortization calculation per debt para sa projected payoff date

Weekly o monthly prompt para mag-usap ang mag-asawa tungkol sa pera — built-in conversation starter.

PAANO GUMAGANA

- Ang app ay nagse-send ng scheduled reminder para sa 'Finance Date' — isang beses sa buwan o linggo.
- May guided questions na lumalabas: 'How did we do this month?', 'Any big expenses coming?', 'Are we on track with our goals?'
- Pwedeng mag-leave ng notes o action items para sa susunod na check-in.

KEY SUB-FEATURES

- Customizable check-in schedule: weekly, bi-weekly, o monthly
- Auto-generated monthly summary para may data sa check-in discussion
- Shared notes o action items na visible ng dalawa
- Check-in history — para makita ang progress at decisions over time
- Mood indicator: 'How are you feeling about our finances?' (1-5 scale)

IMPLEMENTATION NOTES

- checkins table: id, household_id, scheduled_at, completed_at, notes, mood_score
- Push notification sa scheduled time para sa dalawang partner
- Auto-compile ng monthly summary: income, expenses, savings rate, goal progress

Kapag may gusto kang bilhin above a set threshold — kailangan munang i-approve ng partner bago bilhin.

PAANO GUMAGANA

- Mag-se-set ang mag-asawa ng threshold amount — halimbawa, ₱2,000. Anumang gastos above this needs approval.
- Ang partner na gustong bumili ay mag-se-send ng purchase request — may item name, amount, at reason.
- Ang kabilang partner ay mag-a-approve o mag-dededecline, with optional comment.

KEY SUB-FEATURES

- Configurable threshold amount per category (o general threshold)
- Purchase request form: item, store, amount, reason, urgency level
- Push notification sa partner para sa pending approval
- Approval/decline with reason — para may record ng desisyon
- Purchase history: approved, declined, at pending requests
- Emergency override: pwedeng mag-bypass ng approval sa emergencies

IMPLEMENTATION NOTES

- purchase_requests table: id, requester_id, reviewer_id, item_name, amount, reason, status (pending/approved/declined)
- Threshold check: kapag nag-log ng transaction above threshold, auto-trigger approval flow
- FCM push notification sa reviewer kapag may bagong request

Real-time activity stream ng lahat ng shared gastos — may reaction, notes, at visibility sa dalawa.

PAANO GUMAGANA

- Lahat ng transactions sa shared wallet ay lumalabas sa isang feed — parang social media pero para sa pera.
- Real-time update: kapag nag-gastos ang partner, agad na lumalabas sa feed mo.
- Pwedeng mag-leave ng comment o reaction (thumbs up, surprised, heart, etc.) per transaction.

KEY SUB-FEATURES

- Chronological feed ng shared transactions — most recent first
- Transaction card: amount, merchant, category icon, timestamp, who spent
- Emoji reactions per transaction (6 preset reactions)
- Comment thread per transaction para sa context or clarification
- Filter: by person, by category, by date range
- Search transactions by merchant name o amount

IMPLEMENTATION NOTES

- Firebase RTDB o Supabase Realtime para sa live feed updates
- transaction_reactions table: transaction_id, user_id, reaction_type, created_at
- transaction_comments table: transaction_id, user_id, comment_text, created_at
- Pagination: load 20 transactions at a time, infinite scroll

Notify ang partner at ikaw mismo kapag lumagpas sa budget o may unexpected na malaking gastos.

PAANO GUMAGANA

- Ang app ay nagmo-monitor ng spending against the set budget at nagse-send ng alerts kapag may noteworthy events.
- Dalawang uri ng alerts: budget threshold alerts (80%, 100%) at unusual spending alerts.
- Unusual spending = transaction na mas malaki kaysa average spend sa same category.

KEY SUB-FEATURES

- Budget threshold alerts: 'You've used 80% of your Food budget this month'
- Over-budget alert: 'Your Entertainment budget is exceeded by ₱500'
- Large transaction alert: 'Juan just spent ₱5,000 at SM Mall'
- Weekly spending summary every Sunday
- Unusual pattern detection: 'You spent 3x more on dining this week vs usual'
- Alert preferences: pwedeng i-configure ang threshold at types ng alerts

IMPLEMENTATION NOTES

- Alert trigger: run check after every transaction INSERT
- alerts table: id, household_id, user_id, type, message, is_read, created_at
- Average spend baseline: calculate rolling 3-month average per category
- FCM para sa push notifications; in-app notification bell badge

L

Life Event Planner

STANDOUT

Baby, bagong bahay, car — dedicated savings bucket at estimated costs per milestone ng pamilya.

PAANO GUMAGANA

- Ang mag-asawa ay pwedeng mag-plan ng major life events — may estimated cost, target date, at savings progress.
- Bawat life event ay may sariling savings bucket na hiwalay sa regular shared wallet.
- May suggested cost estimates based sa Filipino context (e.g., baby = ₱80K-150K for delivery + supplies).

KEY SUB-FEATURES

- Preset life event templates: Baby, New Home, Wedding Anniversary, Car, Education Fund, Abroad Trip
- Custom life event na pwedeng i-add ng mag-asawa
- Cost breakdown per event: one-time costs, recurring costs, projected total
- Savings bucket na linked sa specific goal
- Countdown timer at milestone tracker
- Resource links: articles tungkol sa financial prep for each life event

IMPLEMENTATION NOTES

- life_events table: id, household_id, type, name, target_date, estimated_cost, current_saved
- event_cost_items table: event_id, item_name, estimated_amount, is_recurring
- Link to savings_goals: each life event generates a linked savings goal automatically

G

Anniversary & Gifts Budget

NICE TO HAVE

Dedicated budget para sa special occasions — birthday, anniversary, Pasko — para hindi na mag-aalala sa gastos.

PAANO GUMAGANA

- I-list ang lahat ng special occasions ng mag-asawa (birthdays, anniversary, Christmas, Valentine's) kasama ang target gift budget.
- Ang app ay nagre-remind ng upcoming occasions at nagpapakita ng remaining special occasions budget.
- Pwedeng mag-ipon nang maaga para sa mga occasion — automated monthly contribution.

KEY SUB-FEATURES

- Occasions calendar: lahat ng special dates at suggested budget per occasion
- Gift ideas list na pwedeng i-add at i-share sa partner (o i-hide para surprise!)
- Sinking fund para sa occasions: monthly ipon para hindi biglaan ang gastos
- Reminder: 30 days, 7 days, at 1 day bago ang occasion
- Post-event log: magkano talaga ang nagastos at satisfaction rating

IMPLEMENTATION NOTES

- occasions table: id, household_id, name, date, recurring (bool), budget_amount
- occasion_sinking_fund table: occasion_id, monthly_contribution, current_balance
- Reminder scheduler: cron job na nag-check ng upcoming occasions daily

Kung mag-iipon tayo ng ganito bawat buwan — kelan kaya tayo maaaring mag-retire nang magkasama?

PAANO GUMAGANA

- I-input ang current ages, target retirement age, at monthly retirement savings.
- Ang app ay nagco-compute ng projected retirement fund based sa compound interest.
- Pwedeng mag-adjust ng inputs para makita kung ano ang impact ng different savings scenarios.

KEY SUB-FEATURES

- Retirement calculator: target retirement age, monthly savings, expected return rate
- Scenario comparison: 'If we save ■5K/month vs ■10K/month'
- Social Security System (SSS) benefit estimator para sa Philippine context
- Retirement readiness score: are you on track?
- Monthly contribution tracker para sa retirement funds (SSS, PAG-IBIG, personal investment)
- Inflation-adjusted projections

IMPLEMENTATION NOTES

- retirement_settings table: household_id, target_retirement_age, monthly_contribution, expected_return_rate
- Compound interest formula: $FV = PMT \times ((1+r)^n - 1) / r$
- SSS benefit lookup table based on monthly salary credit
- Retirement score = $(\text{projected_fund} / \text{needed_fund_at_retirement}) \times 100$

3–6 months of expenses — visual progress bar para sa financial safety net ng buong pamilya.

PAANO GUMAGANA

- Ang emergency fund target ay auto-calculated base sa average monthly expenses ng mag-asawa (3x o 6x).
- May dedicated savings bucket para sa emergency fund — hiwalay sa ibang goals.
- Kapag na-reach ang target, mag-me-celebrate ang app at mag-su-suggest ng next financial goal.

KEY SUB-FEATURES

- Auto-calculate target: average 3-month o 6-month expenses (configurable)
- Dedicated emergency fund bucket na may visual progress bar
- Do-not-touch reminder: clear na label na ito ay para lang sa emergency
- Emergency fund health badge sa home dashboard (Poor/Fair/Good/Excellent)
- Monthly auto-contribution option mula sa shared wallet
- Emergency fund deduction log: kapag nagamit, may record at reminder na mag-replenish

IMPLEMENTATION NOTES

- emergency_fund table: household_id, target_amount, current_amount, months_target (3 or 6)
- $\text{target_amount} = \text{AVG monthly expenses from last 3 months} \times \text{months_target}$
- Fund health score: $\text{current_amount} / \text{target_amount} \times 100 \rightarrow \text{maps to badge label}$

AI Money Coach

STANDOUT

Personalized financial insight — 'Based sa spending niyo ngayong buwan, makapag-iipon kayo ng █X kung...'

PAANO GUMAGANA

- Isang AI-powered chatbot o insight engine na nag-aanalyze ng spending patterns ng mag-asawa.
- Nagge-generate ng weekly o monthly insights na specific sa data ng household — hindi generic advice.
- Pwedeng mag-ask ang user ng direct questions: 'How can we save more this month?'

KEY SUB-FEATURES

- Weekly AI insights card sa home dashboard
- Spending pattern analysis: 'You tend to overspend on weekends'
- Actionable suggestions: 'Cutting dining out by █2K/month could fund your Japan trip in 8 months'
- Goal alignment check: 'At your current rate, you'll miss your savings goal by 2 months'
- Natural language Q&A: ask the AI about your finances
- Personalized tips based sa Filipino financial context (SSS, PAG-IBIG, BPI, GCash, etc.)

IMPLEMENTATION NOTES

- Use Claude API (Sonnet) para sa natural language insights generation
- System prompt: include household financial summary as context
- Cache weekly insights — hindi kailangang i-call ang API bawat screen load
- ai_insights table: household_id, insight_text, generated_at, type (weekly/monthly/goal/alert)

Spender ba siya, saver ka? Quiz + compatibility insights para mapag-usapan ang money mindset ng dalawa.

PAANO GUMAGANA

- Sa onboarding, mag-ta-take ng short quiz ang bawat partner para ma-identify ang kanilang money personality.
- Ang resulta ay nagpapakita ng compatibility score at actionable tips para sa dalawa.
- Hindi ito para husgahan — para maintindihan ang isa't isa at mahanap ang common ground.

KEY SUB-FEATURES

- 5 money personality types: The Saver, The Spender, The Avoider, The Amasser, The Money Monk
- 10-15 question quiz — fun at conversational ang tone
- Compatibility score + detailed explanation ng dynamics ng dalawa
- Tips para sa each personality combo: 'Saver + Spender: Set a weekly fun budget para sa Spender'
- Re-take option: personalities can change over time
- Shareable result card para sa social media

IMPLEMENTATION NOTES

- money_personalities table: user_id, personality_type, quiz_answers (JSON), taken_at
- Scoring matrix: quiz answers map to personality score per type
- Compatibility tips: lookup table based on Partner A type + Partner B type combination
- Use Claude API para sa generated personalized compatibility narrative

Netflix, Spotify, gym — lahat ng recurring charges, i-list at i-review kung worth it pa ang bawat isa.

PAANO GUMAGANA

- I-log ang lahat ng subscriptions ng mag-asawa — streaming, memberships, apps, insurance.
- Ang app ay nagpapakita ng total monthly subscription cost at nagre-remind bago mag-renew.
- May annual cost view para mas maramdaman ang impact ng bawat subscription.

KEY SUB-FEATURES

- Subscription list: name, monthly cost, billing date, category, who uses it
- Total monthly subscription cost — agad malalaman kung magkano na ang napupunta dito
- Annual cost equivalent view: 'Netflix = █189/month = █2,268/year'
- Renewal reminders: 3 days before billing date
- 'Is it worth it?' review reminder every 6 months
- Shared vs personal subscription tagging
- Cancel suggestion: subscriptions na hindi nagagamit ng 30+ days

IMPLEMENTATION NOTES

- subscriptions table: id, household_id, owner_user_id, name, amount, billing_cycle, next_billing_date, category
- Reminder cron job: daily check ng upcoming billing dates
- Usage tracking (optional): last_used_at field na manually updated ng user
- Auto-detect subscriptions from transaction feed (pattern matching sa merchant name)

End-of-month summary na may grade para sa mag-asawa — did you hit your goals? Gamification ng financial health.

PAANO GUMAGANA

- Sa katapusan ng bawat buwan, ang app ay nag-generate ng report card para sa household.
- Ang grade (A–F) ay base sa: budget adherence, savings rate, goal progress, at debt payments.
- May shareable graphic para i-share ng mag-asawa — 'We got a B+ this month!'

KEY SUB-FEATURES

- Overall grade (A–F) based sa weighted financial metrics
- Category grades: Spending Control, Savings Rate, Goal Progress, Debt Management
- Month highlights: best category, area for improvement, biggest win
- Streak tracker: consecutive months na good grade (A or B)
- Comparison sa previous month: 'Better than last month in 3 areas'
- Shareable report card design — Instagram-ready summary card
- Personalized advice para sa next month based sa current grades

IMPLEMENTATION NOTES

- monthly_reports table: household_id, month, year, overall_grade, spending_grade, savings_grade, goal_grade, debt_grade
- Grade algorithm: $\text{spending_score (40\%)} + \text{savings_score (30\%)} + \text{goal_score (20\%)} + \text{debt_score (10\%)}$
- Spending score = $1 - (\text{actual_spending} / \text{budgeted_spending})$ — higher is better
- Generated sharable card: HTML canvas o server-side image generation (Pillow/wkhtmltopdf)
